PROFESSIONAL SUMMARY

Front-End Developer building web and mobile applications with React, Next.js, TypeScript, React Native, Vue.js, and REST APIs. Experienced in production features, billing systems, rewards platforms, employee engagement platforms, and event-based interactive web applications. Focused on clean interfaces, maintainable code, and practical solutions that improve real workflows.

TECHNICAL SKILLS

Front-End: JavaScript, TypeScript, React, React Native, Next.js, Vue.js, HTML, CSS, Tailwind CSS, MUI, Prettier, ESLint, TanStack Query, REST APIs, Axios, AG Grid, HyperFormula, Phaser, Three.js, Shadcn UI.
State Management: Zustand, Redux Toolkit
Backend & Tools: Node.js, Express.js, NestJS, Git, GitHub, Bitbucket, GitLab, VS Code
AI-Assisted Development: OpenAI Codex, GitHub Copilot, Claude Code

EXPERIENCE

App-Bar | Central, Hong Kong
Front-End Developer **|** July 2024 - Present

- Developed and maintained admin CMS, web, and mobile app features for AXA HUMA using React, Next.js, TypeScript, React Native, REST APIs, supporting 1,800+ employees across Hong Kong and Macau.
- Shipped 9+ production releases with zero critical post-deployment issues by handling front-end development, bug fixing, QA support, SIT/UAT validation, release coordination.
- Built high-engagement internal campaign features, including an Annual Dinner RSVP flow with 1,300+ submissions, improving employee participation and reducing manual coordination.
- Developed interactive event applications for HKSTP 2026, including a physics-based stacking game and 3D egg matching game with real-time iPad-to-display synchronization using React, TypeScript, Phaser, Three.js, WebGL, and PeerJS.

Workstream PH | Workstream Billing System | Clark Center, Pampanga, PH
Freelance / Project-Based Full-Stack Developer | March 2026 - Present

- Building a billing automation platform using React, Vite, TypeScript, AG Grid, HyperFormula, Supabase, ExchangeRate API, MUI, and SCSS Modules.
- Developed complex workflows for client billing, salary computations, billing adjustments, invoice drafts, reporting, and Excel/PDF exports.
- Implemented spreadsheet-like interfaces with reusable validation, computed fields, currency conversion, and structured billing data handling.
- Improved finance workflow reliability by centralizing billing periods, employee records, adjustments, and invoice preparation into consistent front-end system.

World of Minifigs by Brick Extreme LLC | Mandaluyong City NCR, PH
Freelance / Project-Based Front-End Developer | April 2025 – Sept 2025

- Built the front-end foundation for a custom LEGO minifigure builder website linked to the company's main e-commerce platform website using React, Vite, TypeScript, Tailwind CSS, TanStack Query, REST APIs, Express.js, MongoDB, and reusable components architecture.
- Developed product browsing, builder UI, and API-driven data flows to support a smoother customization experience for users.
- Created modular folder structures, reusable UI components, and API integration layers to improve maintainability, scalability, and collaboration with the backend developer.

Pixel8: Web Solutions & Consultancy Inc. | Legazpi City Albay, PH
Front-End Developer Intern | April 2023 - June 2023

- Completed hands-on front-end development training using Vue.js, Quasar, JavaScript, REST APIs, and responsive UI implementation.
- Assisted in building HR leave management features, including employee leave submission and manager approval screens.
- Practiced form validation, API-connected data handling, Git workflows, and Figma-to-UI implementation in a professional development environment.

EDUCATION

PHINMA- University of Pangasinan | Dagupan City, Pangasinan PH
BS – Computer Engineering | June 2019 - June 2024
